

SPORTS MEDICINE AND ACUTE INJURIES

GARM's Dream Team consists of a powerful brain trust of surgeons/stem cell experts that comprise arguably the most coveted leadership team of physicians globally. Attached, please find short biographies of Global Leaders in Sports Medicine and Stem Cell Experts: James R. Andrews, M.D., Glenn C. Terry, M.D., and Robert W. Alexander, M.D.

GARM's Dream Team of physicians is led by visionary Glenn C. Terry, M.D., a globally renowned Sports Medicine Physician, who has participated as an Orthopedic Surgeon Leader in both the Barcelona and Atlanta Olympic Games. Dr. Terry brings 40+ years surgical experience treating athletes of all levels.

How are GARM's treatments designed for sports medicine applications? Targeted stem cell injections of GARM's proprietary biocellular medicine protocol with or without arthroscopic surgery provides all types of active adults the healing power they need to recover quickly from an injury with markedly less discomfort. In addition to very specific targeted injections, GARM physicians provide patients with a powerful stem cell solution administered IV. The goal is to release extraordinarily high numbers of stem cells systemically, which then target additional spots of inflammation and injury.

GOALS & BENEFITS

- Reduced recovery time
- Heal faster
- Reduce or eliminate discomfort
- Have the most technologically advanced treatment program developed by the Leaders of Sports Medicine and Stem Cell Experts focused entirely on YOU!

REPAIR INJURIES NOW, PREVENT PROBLEMS LATER. ENHANCE YOUR BODY'S HEALING POTENTIAL NATURALLY.
